

Government Polytechnic Nagpur

DEPARTMENT OF INFORMATION TECHNOLOGY

QUESTION BANK

SUBJECT : IT504E-DATAWAREHOUSINGAND MINING

Q.NO	QUESTIONS	COMPETENCE
1.Introduction to data warehouse and Data mining		
1.	How is data ware house different from a database? Identify the similarity.	Remember
2.	Differentiate metadata and data mart.	Understand
3.	Analyze why one of the biggest challenges when designing a data ware house is the selection and cleaning.	Analyze
4.	How would you evaluate the goals of data mining?	Evaluate
5.	List different data warehouse tool.	Remember
6.	What elements would you use to relate the design of data warehouse?	Apply
7.	Define Data mart	Remember
8.	Define star schema	Remember
9.	What is Data warehousing? Explain the benefits of Data warehousing.	Evaluate
10.	Why data transformation is essential in the process of Knowledge discovery? Describe it.	Remember
11.	Describe Knowledge discovery in data.(KDD Steps)	Understand
12.	Distinguish datawarehouse and database	Understand
13.	How would you show your understanding in Multidimensional data model?	Apply
14.	Formulate what is data discretization.	Create
15.	List Application of Data Warehouse and Data Mining.	Remember
16.	Describe Issues in Data Warehouse and Data Mining	Understand
2.Datawarehouse and OLAP Technology		
17.	List features of Metadata repository in data warehousing	Remember
18.	Define Metadata repository	Remember
19.	Illustrate the benefits of metadata repository.	Apply
20.	Design the data warehouse architecture.	Create

21	What is data warehouse? Give the Steps for design and construction of Data Warehouses and explain with three tier architecture diagram.	Understand
22	Diagrammatically illustrate and discuss the following preprocessing techniques: (i) Data cleaning (ii) Data Integration (iii) Data transformation (iv) Data reduction	Apply
23	Draw the data warehouse architecture and explain its components.	Analyze
24	Analyze the information needed to support DBMS schemas for Decision support.	Analyze
25	Describe the overall architecture of data warehouse?	understand
26	Suppose that a data warehouse consists of four dimensions customer, product, salesperson and sales time, and the three measure sales Amt(in rupees), VAT(in rupees) and payment_type(in rupees). Draw star schema that is popularly used for modeling data warehouses and explain it.	Evaluate
27	Define data Preprocessing? Describe the various data pre processing techniques.	Understand
28	Describe the steps involved in Knowledge discovery in databases(KDD).	Understand
29	Describe in detail about Data marts.	Understand
30	Compare the similarities and differences between the database and datawarehouse.	Evaluate
31	Compare OLTP and OLAP.	Analyze
32	Describe Different OLAP Operation with example.	Understand
33	Summarize the distinct features of OLTP with OLAP.	Understand
34	What is multidimensional data model?. Give example.	Remember
35	List Different OLAP Server.	Remember
36	Describe MOLAP and ROLAP.	Understand
37	.Summarize the various OLAP operations in the Multidimensional Data Model.	Evaluate

UNIT 3- DATA MINING		
1	Define Data mining. List out the steps in data mining?	Remember
2	List the steps involved in the process of KDD. How it is different from data mining?	Remember
3	List application of data mining	Remember
4	Compare drill down with roll up approach.	Analyze
5	Describe what the other kinds of data are.	Understand
6	Define association and correlations.	Remember
7	Evaluate the major tasks of data preprocessing.	Evaluate
8	Consider the following set of data $X = \{15, 27, 62, 35, 39, 50, 44, 44, 22, 98\}$ Do preprocessing using smoothing by bin means and bin boundary to smooth the data, using a bin of depth 3. Evaluate it.	Evaluate
9	Formulate why do we need data transformation. Mention the ways by which data Can be transformed.	Create
10	Discuss whether or not each of the following activities is a data mining task. <ol style="list-style-type: none"> 1. Credit card fraud detection using transaction records. 2. Dividing the customers of a company according to their gender. 3. Computing the total sales of a company 4. Predicting the future stock price of a company using historical records. 5. Monitoring seismic waves for earthquake activities. 	Understand
UNIT-4- Mining Association Rules in Large Databases		
1	Define correlation and market basket analysis.	Remember
2	Formulate the principle frequent itemset .	Create
3	How would you explain the principle of Apriori algorithm? How can the efficiency of an Apriori algorithm be improved?	Evaluate
4	Define Data pruning. State the need for pruning phase in decision tree construction.	Remember
5	List advantages of apriori algorithm.	Remember
6	How will you generate association rules from frequent itemsets	Analyze
7	Discuss association rule mining .list the two interesting measures of an association rule.	Understand
8	List Pros and Cons of Apriori Algorithm	Understand
9	Describe why Association Mining is necessary	Understand
10	List the two interesting measures of an association rule. 1.Support 2.Confidence	Remember
11	Giving concrete example , explain a method that performs frequent item set mining by using the prior knowledge of frequent item set properties.	Understand

12	Describe in detail about frequent pattern classification.	Understand																						
13	Describe Apriori Algorithm with example.	Understand																						
14	Apply the Apriori algorithm for discovering frequent item sets of the table. Use 0.3 for the minimum support value. Illustrate each step of the Apriori Algorithm. <table><tr><td>Trans ID</td><td>Items Purchased</td></tr><tr><td>101</td><td>Milk,bread,eggs</td></tr><tr><td>102</td><td>Milk,juice</td></tr><tr><td>103</td><td>Juice,butter</td></tr><tr><td>104</td><td>Milk,bread,eggs</td></tr><tr><td>105</td><td>Coffee,eggs</td></tr><tr><td>106</td><td>Coffee</td></tr><tr><td>107</td><td>Coffee,Juice</td></tr><tr><td>108</td><td>Milk,bread,cookies,eggs</td></tr><tr><td>109</td><td>Cookies,butter</td></tr><tr><td>110</td><td>Milk,bread</td></tr></table>	Trans ID	Items Purchased	101	Milk,bread,eggs	102	Milk,juice	103	Juice,butter	104	Milk,bread,eggs	105	Coffee,eggs	106	Coffee	107	Coffee,Juice	108	Milk,bread,cookies,eggs	109	Cookies,butter	110	Milk,bread	Analyze
Trans ID	Items Purchased																							
101	Milk,bread,eggs																							
102	Milk,juice																							
103	Juice,butter																							
104	Milk,bread,eggs																							
105	Coffee,eggs																							
106	Coffee																							
107	Coffee,Juice																							
108	Milk,bread,cookies,eggs																							
109	Cookies,butter																							
110	Milk,bread																							
15	Find all frequent item sets for the given training set using Apriori. Use 0.2 for the minimum support value. Illustrate each step of the Apriori Algorithm TID ITEMS BROUGHT T100 {M , O , N , K , E , Y } T200 {D , O , N , K , E , Y } T300 {M , A K , E } T400 {M ,U , C , K ,Y } T500 {C , O , O ,K , I , E }	Analyze																						
16	Find all frequent item sets for the given training set using Apriori. <table><tr><td>Transaction ID</td><td>Items Bought</td></tr><tr><td>2000</td><td>A,B,C</td></tr><tr><td>1000</td><td>A,C</td></tr><tr><td>4000</td><td>A,D</td></tr><tr><td>5000</td><td>B,E,F</td></tr></table> Let minimum support 50% and minimum confidence 50%.	Transaction ID	Items Bought	2000	A,B,C	1000	A,C	4000	A,D	5000	B,E,F	Analyze												
Transaction ID	Items Bought																							
2000	A,B,C																							
1000	A,C																							
4000	A,D																							
5000	B,E,F																							
UNIT-5- Classification and Prediction																								
1	Compare Classification and Prediction.	Understand																						
2	Describe the issues regarding classification and prediction.	Understand																						
3	Illustrate an algorithm for classification using decision trees.	Apply																						
4	What approach would you use to apply decision tree induction?	Apply																						
5	State the types of Regression	Remember																						
6	Illustrate Issues regarding Classification & Prediction	Apply																						
7	Define Regression	Remember																						

8	<p>A Simple example from the stock market involving only discrete range has profit as categorically attribute with values {UP,DOWN} and training data is</p> <table><tr><td>Age</td><td>Competition</td><td>Type</td><td>Profit</td></tr><tr><td>old</td><td>Yes</td><td>Software</td><td>Down</td></tr><tr><td>old</td><td>No</td><td>Software</td><td>Down</td></tr><tr><td>old</td><td>No</td><td>Hardware</td><td>Down</td></tr><tr><td>mid</td><td>Yes</td><td>Software</td><td>Down</td></tr><tr><td>mid</td><td>Yes</td><td>Hardware</td><td>Down</td></tr><tr><td>mid</td><td>No</td><td>Hardware</td><td>Up</td></tr><tr><td>mid</td><td>No</td><td>Software</td><td>Up</td></tr><tr><td>new</td><td>Yes</td><td>Software</td><td>Up</td></tr><tr><td>new</td><td>No</td><td>Hardware</td><td>Up</td></tr><tr><td>new</td><td>No</td><td>Software</td><td>Up</td></tr></table> <p>1. Apply Decision Tree Algorithm –ID3 & Construct Decision Tree 2. Enlist rules from Decision Tree.</p>	Age	Competition	Type	Profit	old	Yes	Software	Down	old	No	Software	Down	old	No	Hardware	Down	mid	Yes	Software	Down	mid	Yes	Hardware	Down	mid	No	Hardware	Up	mid	No	Software	Up	new	Yes	Software	Up	new	No	Hardware	Up	new	No	Software	Up	Apply																															
Age	Competition	Type	Profit																																																																										
old	Yes	Software	Down																																																																										
old	No	Software	Down																																																																										
old	No	Hardware	Down																																																																										
mid	Yes	Software	Down																																																																										
mid	Yes	Hardware	Down																																																																										
mid	No	Hardware	Up																																																																										
mid	No	Software	Up																																																																										
new	Yes	Software	Up																																																																										
new	No	Hardware	Up																																																																										
new	No	Software	Up																																																																										
9	<p>Apply Decision Tree Algorithm –ID3 & Construct Decision Tree for below given data.</p> <table><tr><td>Outlook</td><td>Temp</td><td>Humidity</td><td>Windy</td><td>PlayGolf</td></tr><tr><td>Rainy</td><td>Hot</td><td>High</td><td>False</td><td>No</td></tr><tr><td>Rainy</td><td>Hot</td><td>High</td><td>True</td><td>No</td></tr><tr><td>Overcast</td><td>Hot</td><td>High</td><td>False</td><td>Yes</td></tr><tr><td>Sunny</td><td>Mild</td><td>High</td><td>False</td><td>Yes</td></tr><tr><td>Sunny</td><td>Cool</td><td>Normal</td><td>False</td><td>Yes</td></tr><tr><td>Sunny</td><td>Cool</td><td>Normal</td><td>True</td><td>No</td></tr><tr><td>Overcast</td><td>Cool</td><td>Normal</td><td>True</td><td>Yes</td></tr><tr><td>Rainy</td><td>Mild</td><td>High</td><td>False</td><td>No</td></tr><tr><td>Rainy</td><td>Cool</td><td>Normal</td><td>False</td><td>Yes</td></tr><tr><td>Sunny</td><td>Mild</td><td>Normal</td><td>False</td><td>Yes</td></tr><tr><td>Rainy</td><td>Mild</td><td>Normal</td><td>True</td><td>Yes</td></tr><tr><td>Overcast</td><td>Mild</td><td>High</td><td>True</td><td>Yes</td></tr><tr><td>Overcast</td><td>Hot</td><td>Normal</td><td>False</td><td>Yes</td></tr><tr><td>Sunny</td><td>Mild</td><td>High</td><td>True</td><td>No</td></tr></table>	Outlook	Temp	Humidity	Windy	PlayGolf	Rainy	Hot	High	False	No	Rainy	Hot	High	True	No	Overcast	Hot	High	False	Yes	Sunny	Mild	High	False	Yes	Sunny	Cool	Normal	False	Yes	Sunny	Cool	Normal	True	No	Overcast	Cool	Normal	True	Yes	Rainy	Mild	High	False	No	Rainy	Cool	Normal	False	Yes	Sunny	Mild	Normal	False	Yes	Rainy	Mild	Normal	True	Yes	Overcast	Mild	High	True	Yes	Overcast	Hot	Normal	False	Yes	Sunny	Mild	High	True	No	Apply
Outlook	Temp	Humidity	Windy	PlayGolf																																																																									
Rainy	Hot	High	False	No																																																																									
Rainy	Hot	High	True	No																																																																									
Overcast	Hot	High	False	Yes																																																																									
Sunny	Mild	High	False	Yes																																																																									
Sunny	Cool	Normal	False	Yes																																																																									
Sunny	Cool	Normal	True	No																																																																									
Overcast	Cool	Normal	True	Yes																																																																									
Rainy	Mild	High	False	No																																																																									
Rainy	Cool	Normal	False	Yes																																																																									
Sunny	Mild	Normal	False	Yes																																																																									
Rainy	Mild	Normal	True	Yes																																																																									
Overcast	Mild	High	True	Yes																																																																									
Overcast	Hot	Normal	False	Yes																																																																									
Sunny	Mild	High	True	No																																																																									
10	<p>Apply Decision Tree Algorithm –ID3 & Construct Decision Tree for below given data.</p> <table><tr><td>Id</td><td>Age</td><td>Income</td><td>Student</td><td>Credit Ratings</td><td>Buys Computer</td></tr><tr><td>1</td><td><=30</td><td>High</td><td>No</td><td>Fair</td><td>No</td></tr><tr><td>2</td><td><=30</td><td>high</td><td>No</td><td>Excellent</td><td>No</td></tr><tr><td>3</td><td>31-40</td><td>high</td><td>No</td><td>Fair</td><td>Yes</td></tr><tr><td>4</td><td>>40</td><td>Medium</td><td>No</td><td>Fair</td><td>Yes</td></tr><tr><td>5</td><td>>40</td><td>Low</td><td>Yes</td><td>Fair</td><td>Yes</td></tr><tr><td>6</td><td>>40</td><td>low</td><td>Yes</td><td>Excellent</td><td>No</td></tr><tr><td>7</td><td>31-40</td><td>Low</td><td>Yes</td><td>Excellent</td><td>Yes</td></tr></table>	Id	Age	Income	Student	Credit Ratings	Buys Computer	1	<=30	High	No	Fair	No	2	<=30	high	No	Excellent	No	3	31-40	high	No	Fair	Yes	4	>40	Medium	No	Fair	Yes	5	>40	Low	Yes	Fair	Yes	6	>40	low	Yes	Excellent	No	7	31-40	Low	Yes	Excellent	Yes	Apply																											
Id	Age	Income	Student	Credit Ratings	Buys Computer																																																																								
1	<=30	High	No	Fair	No																																																																								
2	<=30	high	No	Excellent	No																																																																								
3	31-40	high	No	Fair	Yes																																																																								
4	>40	Medium	No	Fair	Yes																																																																								
5	>40	Low	Yes	Fair	Yes																																																																								
6	>40	low	Yes	Excellent	No																																																																								
7	31-40	Low	Yes	Excellent	Yes																																																																								

	8	<=30	Medium	No	Fair	No
	9	<=30	low	Yes	Fair	Yes
	10	31-40	Medium	Yes	Fair	Yes
	11	<=30	Medium	Yes	Excellent	Yes
	12	31-40	Medium	No	Excellent	Yes
	13	31-40	High	Yes	Fair	Yes
	14	>40	Medium	No	Excellent	No

UNIT 6- CLUSTERING AND TRENDS IN DATA MINING		
1	Define Clustering.	Remember
2	Define K-means partitioning.	Remember
3	Explain why a cluster has to be evaluated.	Analyze
4	Define what is meant by K nearest neighbor algorithm.	Remember
5	Illustrate some applications of data mining.	Apply
6	Formulate the role of application and challenges in clustering.	Create
7	Classify the hierarchical clustering methods.	Analyze
8	Define outlier. Examine the outlier analysis.	Remember
9	Discuss the challenges of outlier detection.	Understand
10	Distinguish between Classification and clustering.	Understand
11	Evaluate what information is used by outlier detection method.	Evaluate
12	Give the categorization of major clustering methods.	Understand
13	What is clustering? Describe in detail about the features of K- means partitioning method.	Remember
14	Explain in detail about hierarchical based method.	Analyze
15	Consider five points { X ₁ , X ₂ ,X ₃ , X ₄ , X ₅ } with the following coordinates as a two dimensional sample for clustering: X ₁ = (0,2.5); X ₂ = (0,0); X ₃ = (1.5,0); X ₄ = (5,0); X ₅ = (5,2) Illustrate the K-means partitioning algorithm using the above data set.	Apply

16	<p>Discuss the steps in K-means algorithm and evaluate the following table</p> <table border="1"> <thead> <tr> <th>Subject</th><th>A</th><th>B</th></tr> </thead> <tbody> <tr><td>1</td><td>1.0</td><td>1.0</td></tr> <tr><td>2</td><td>1.5</td><td>2.0</td></tr> <tr><td>3</td><td>3.0</td><td>4.0</td></tr> <tr><td>4</td><td>5.0</td><td>7.0</td></tr> <tr><td>5</td><td>3.5</td><td>5.0</td></tr> <tr><td>6</td><td>4.5</td><td>5.0</td></tr> <tr><td>7</td><td>3.5</td><td>4.5</td></tr> </tbody> </table> <p>using K- means.</p>	Subject	A	B	1	1.0	1.0	2	1.5	2.0	3	3.0	4.0	4	5.0	7.0	5	3.5	5.0	6	4.5	5.0	7	3.5	4.5	Evaluate
Subject	A	B																								
1	1.0	1.0																								
2	1.5	2.0																								
3	3.0	4.0																								
4	5.0	7.0																								
5	3.5	5.0																								
6	4.5	5.0																								
7	3.5	4.5																								
17	<p>Analyze and elaborate the current trends in data mining in any three fields .</p> <ol style="list-style-type: none"> 1. Financial data analysis 2. Biological data analysis 3. Telecommunication industry 4. Intrusion detection 5. Retail industry 	Create
